Marcus 'refined' homopolymer polyethylene waxes are hard, high melting waxes with low viscosity. Low molecular weights and narrow distribution combined with their high crystallinity give Marcus Waxes their unique properties. Products with higher density translates to higher crystallinity.

Applications/Uses in:

Inks, Paint, Engineering Plastic (Composites), Masterbatches, PVC extrusion, Lubrication, Hot Melt Adhesive, Pigment dispersion/Colouring agent, Coating, Surface Modifying, Release agent, Viscosity adjustment, Scratch resistance, Additives and stabilizers, Polishes, Rubber processing, WPC, Packaging, Blending with other waxes etc.

### **Packaging and Product Form**

Standard packaging:25kg/50lb (22.7kg) PP woven/plastic lined Kraft bags with 25bags /45 bags to the pallet (625kg/1000kg). Super sacks & Gaylord boxes are also available upon request. Marcus homopolymer waxes are available as prill form (0.3-0.5mm) typical and powdery form (0.1-0.3 mm) typical.

#### **Safety**

Marcus Polyethylene homopolymer are regarded as non-hazardous when exposure is controlled using accepted industrial hygiene practices. Please consult the Material Safety Data Sheet for specific information on the safe handling of Marcus Polyethylene waxes.

Marcus oxidized polyethylene wax and oxidized HDPE/LDPE are a range of low & high density, low & high melt point specialty polymer - Oxidized Polyethylene. These are manufactured by using virgin PE Wax and virgin HDPE/LDPE feedstock; their oxidation process is conducted under special controlled conditions to maintain superior qualities and aesthetic properties.

Applications/Uses: The main feature is that the oxidation of polyethylene allows

formulators to incorporate the beneficial properties of high viscous, high carbon number & high melt point hydrophobic hydrocarbon OPE into aqueous systems.

As an process add these oxidized polyethylene enhanced

the wide range of applications in chemical industries such as emulsion, polish, textile, coating, as a metal release agent & fusion control for PVC processing etc.

**Packaging:** Standard packaging: 25kg PP woven sacks bags, Palletized with 25 bags & wrapped for shipment. FIBC Jumbo Bags of 625 kg & 500 kg are also available.

<u>Safety:</u> Marcus Oxidized Polyethylene are regarded as non-hazardous when exposure is controlled using industrial hygiene practices. Please see the Safety Data Sheet for specific information on the safe handling of Marcus oxidized PE wax/ HDPE/LDPE.

## APPLICATION SUMMARY

-		AFFEICATION SOWIWAKT					
	APPLICATION MARCUS GRADE		FORMM	ATTRIBUTESES			
	Asphalt	M 200, M 300, M 500, PR 700	Prill, Powder	Softening point & hardness modifier, Flow agent.			
	Cable filling	M 200, M 300, M 500, PR 700	Prill, Powder	Gelling agent & improved Heat resistance			
	Candle	M 095, M 200, PR 700	Prill, Powder	Enhance appearance, opacity & Burning time of candles			
	Color Concentrate & Master Batches	M 200, M 300, M 500, PR 700	Prill, Powder	Improvement of pigment wettability and dispersion.			
	CorrugatedBoard	M 200, M 300, M 500, PR 700	Prill, Powder	Enhancement of surface forscuff & blocking resistance.			
	Emulsion	M 3400, M 3500, MC 629, MC 316, MC 330, M 10,	Prill, Powder	Uniformity of content, Palatability, Deliverability, Re-dispersibility			
	Expanded PSFoam	M 200, M 300, M 500	Prill, Powder	Lubricant & blowing agentDispersant.			
	Fruit coating	M 3400, M 3500	Prill	Excellent barrier properties & provision of high gloss.			
	Hot meltAdhesive	M 200, M 300, M 500, M 600	Prill, Powder	Viscosity control & improved heat resistance.			
	Hot melt Road marking	M 200, M 300, PR 700	Prill, Powder	Viscosity reduction, Processing Benefits, Heat resistance.			
	Metal protection	M 200, M 300, M 500, M 3400	Prill, Powder	Surface improvements such as hardness.			
	Mold release	M 200, M 300, M 500, M 3400, M 3500	Prill	Excellent release properties by variety of application means.			
	Paint	M 200, M 300, M 500, MC 617, M 5010, M 5005	Prill or micronized	Flatting, abrasion & scratch Resistance, anti-blocking.			
	Paper coating	IVIC 61/	Prill, Powdery	Adjustment of slip &hardness properties.			
	Polish	M 200, M 300, M-10, M 3400, M 3500, MC 629, MC 316	Prill, Powder	Gelling agent. Good scuff slip &black mark resistances.			
	Printing ink	M 5010. M 5005	Prill or micronized	Excellent rub resistance.			
	PVC Compounding	M 300, M 500, M 600, PR 700, M3400, MC316, MC330, M 10	Prill, Powder	Efficient external/internal lubricants at low concentrations			
	Rubber Processing	M 200, M 300, M 500,	Prill, Powder	Superb processing aid & lubricant.			
	Textile treatment	M 3400, M 3500, MC 629, MC 629A, MC 316, MC 330	Prill, Powder	Lubricant &softening action, reduced needle cutting			
	PV Encapsulate	M 10	Powder	Electrical Isolation, Thermal stability			
	Solvent/Chlorinate d Paraffin wax	PE OIL - MPEO-879	Clear Liquid	Provides more active sites for grafting, Reactivity enhancer.
